

SIMPLE SECURE PASSWORDLESS LOGIN

REAL MFA + SSO FOR TRUE ZERO TRUST ACCESS™

THE USERNAME & PASSWORD METHOD
FOR SECURITY IS NOT WORKING.

**89% OF WEB APPLICATION
BREACHES ARE PASSWORD-
RELATED**
- Verizon

**81% OF SECURITY
BREACHES WORLDWIDE ARE
CREDENTIAL-BASED**
- Verizon

**CREDENTIAL STUFFING
WILL COST \$5BN THIS YEAR
- IN THE U.S. ALONE**
- InfoSecurity.

USERNAME AND PASSWORD SECURITY CONTROL WAS INVENTED IN 1961.
THE TECH INDUSTRY HAS BEEN SEARCHING FOR SOMETHING BETTER EVER SINCE.

NOW, THERE'S TRAITWARE:
PASSWORDLESS ENTERPRISE LOGIN
MFA AT ACCOUNT CREATION

“

"... Authentication in nearly half the time as previously done was outstanding. Working in penetration testing and across several Linux environments, the ability to use passwordless MFA remotely has been a tremendous differentiator in protecting our powerful attack systems."

- Matt Berri
Fortune 100 Company

WHY TRAITWARE?

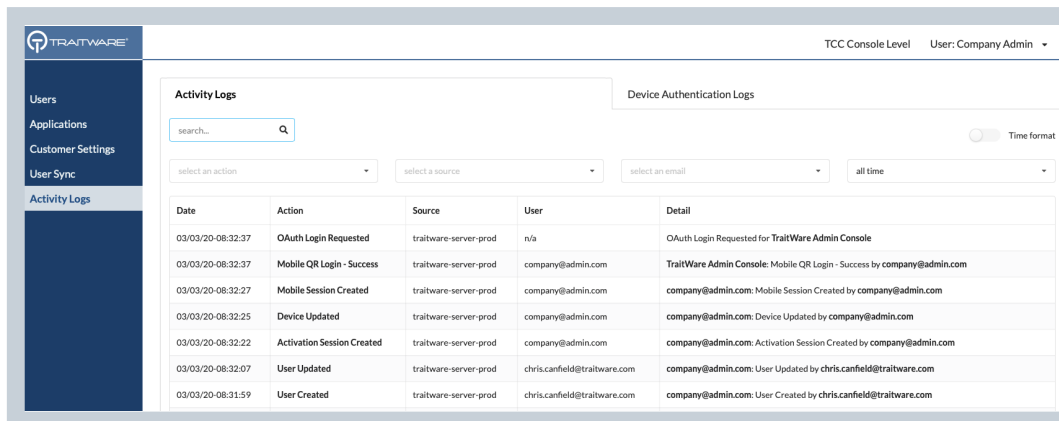

THE LANDSCAPE OF LOGIN SECURITY HAS CHANGED

Legacy login - with username and password - is increasingly risky and costly. Most security breaches are credential-based. Yet many alternative solutions are too complicated and time-consuming to be easily adapted by modern business.

Introducing TraitWare - Simple, secure passwordless MFA + SSO Login. Leveraging modern technology to solve a legacy problem, TraitWare offers a seamless, efficient passwordless experience - on an Identity Platform that is more cost-effective and more secure than alternative solutions on the market.

REDUCE COSTS - WITH TRAITWARE

-  Large enterprise averages \$700K a year on password support. - Forrester
TraitWare will cut password support budgets by 60% or more.
-  The average cost of a help desk call is \$70, with over 50% being for password reset. - Forrester
TraitWare eliminates passwords for end users.
-  The average cost of an enterprise data breach is \$3.92M. - IBM
TraitWare eliminates the #1 threat of data breaches.

“

"Working in a highly secure, large enterprise environment with hundreds of users changing roles and on- and offboarding daily, the ability to instantly have MFA applied at account creation with TraitWare was a significant improvement over building multiple systems into the authentication flow."

- Matt Berri
Fortune 100
Company

BETTER - THE TRAITWARE WAY

More Secure - No more lost or stolen passwords or security tokens. Relies on the end user's device, traits, and dynamic authentication token instead.

Faster, Smoother - Reduces friction at login, time spent managing credentials, and down time due to password lockouts.

Easier to Use - No software to install. No external hardware to buy. TraitWare is plug and play, and can be up and running in one day.

Simple - Easy QR login.

Adaptable - Works on desktop, laptop, tablet - all mobile devices.

Compliant - Meets requirements for NIST, AAL2, HIPAA, PCI, SEC, GDPR and more.

Standard - OIDC, SAML 2.0, on iOS or Android, for virtually any application

Customizable - 3-5-factor authentication - right from account creation.

"TraitWare checks all the boxes - increased security & compliance with current best practices, an easy-to-use app for our team, and deployment took 1 day to transition our full team. ..."

- David Loberg
Metrolina

AUTHENTICATION - WHEREVER YOU NEED IT

QR Login to Servers - Use a QR login to securely access Linux servers.

Partner/Business Use Cases -

Incorporate white label TraitWare security into your customer and partner-facing applications and mobile apps.

Enterprise - Provide secure employee logins for web-based applications.

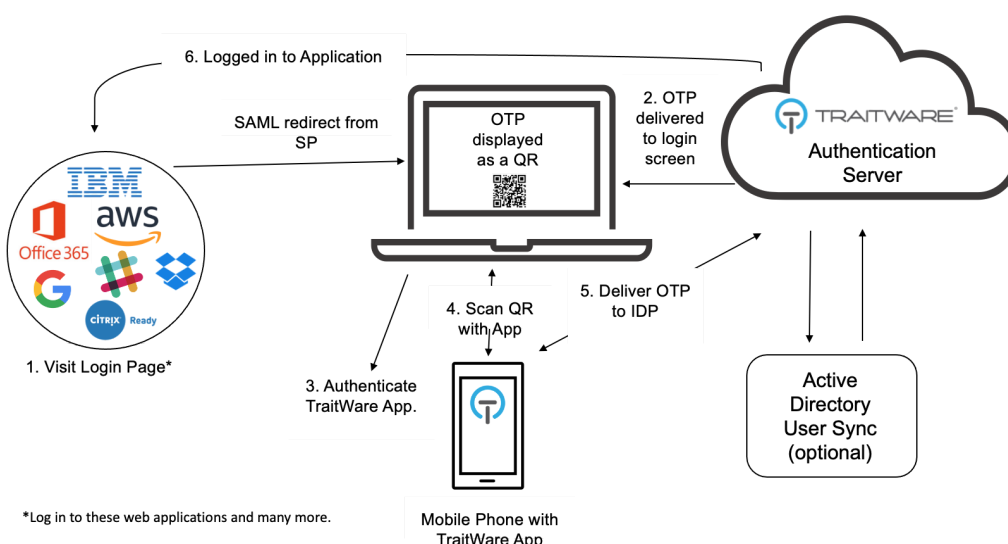

External - Give partners, contractors, and customers access to your network.

WordPress - TraitWare can be integrated with WordPress so that digital design firms can ensure secure client access to their websites.

HOW IT WORKS

TraitWare Passwordless Login via SAML or OIDC

-  **Simple, More Secure SSO & MFA right from registration**
-  **Lower Cost**
-  **No Password Management**
-  **Empower & Secure your Remote Workforce**

SIMPLIFY. SECURE. SAVE.
